

Instructions for Continued Airworthiness Assessment

S & T Aircraft Accessories, Inc.
310 FM 483
New Braunfels, Texas 78130
FAA Repair Station Number CC2R737K
Unlimited Accessory Class 1 & 2

After review of the Repair Specification and the manuals for each engine and aircraft as referenced in the Installation Eligibility section therein, this repair station finds no need for modified Instructions for Continued Airworthiness to be issued. Data supporting this decision is:

- The process as described in the Repair Specification indicate identity and/or similarity in terms of material to the manufacturer's product as determined by analysis of the original manufacturer's product.
- The process as described in the Repair Specification indicate identity in terms of dimension to the original manufacturer's product as determined by analysis of the original manufacturer's product.
- The process as described in the Repair Specification restores the article to a condition that is at least equal to or greater than that of the original manufacturer's product as determined by testing of operability.

No modifications to the Instructions for Continued Airworthiness are required.

Repair Specification Title: Repair Specification for the Repair of DC Carbon Pile Voltage Regulators and the Manufacturing of Replacement Sub-Components Thereof

Repair Specification Number: ST-20230201
